PROFESSIONAL EXPERIENCE

Computer Science Engineer / Full-Stack Web Developer **Nov 2024 – Oct 2025**

Gas Turbine Research Establishment (GTRE), DRDO

(Contracted via Jananee Trading & Services) Bengaluru, India

- Developed a digital production-planning platform (Spring Boot, Angular, Oracle DB), streamlining 100+ job cards across 6 manufacturing stages for 40+ users in 3 departments.
- Automated production reporting through 5 JasperReports dashboards, reducing manual reporting time by 30% (~10 hours/week) and improving operational decision-making.
- Built 15+ REST APIs for real-time component tracking and scheduling, replacing manual status updates with centralized data access.
- Collaborated with engineers, planners, and supervisors across 3 departments to gather requirements, optimize workflows, and support digital adoption.

PROJECTS

OpsPilot | AI-Powered Operations Intelligence Platform | In Development **Oct 2026 – Present**

- Developing an AI-powered operations platform using LLMs and RAG to analyze 1,000+ synthetic business records, identify workflow bottlenecks, and deliver actionable operational insights.
- Building an interactive dashboard to monitor 10+ business KPIs, automate status reporting, and detect operational risks, targeting a 40% reduction in manual reporting time.
- Implementing natural-language analytics and AI-assisted recommendations using React, Python, FastAPI, and PostgreSQL, with human approval for suggested actions.

StockForesight: A Dash-Based System for Visualisation and Forecasting of Stock Prices **Dec 2023-March 2024**

BNM Institute of Technology, Bengaluru

- Developed a stock market analysis platform integrating machine learning and interactive dashboards to visualize historical stock prices and market trends.
- Implemented Support Vector Regression (SVR) for stock price forecasting, analyzing 1,000+ historical trading records to identify market patterns and support data-driven insights.
- Built an interactive web application using Python, Dash, HTML, and CSS, enabling stock performance analysis across multiple time periods with real-time market data integration.
